			Copy settings
Lang	uage for n	on-Unicode program	s
This text	setting (s in program	ystem locale) control ns that do not suppo	s the language used when displaying rt Unicode.
Cur	rent langu	age for non-Unicode	programs:
1	English (U	nited States)	
			Change system locale
			OK xitonachena c

6. In the pop-up region settings dialog box, select Chinese (simplified, China) from the

drop-down list. This represents simplified Chinese, and there are other Chinese in it. Don't make a mistake. At this time, a dialog box pops up to restart. Restart as required.

Region Settings	×
Select which language (system loc that do not support Unicode. This computer. Current system locale:	ale) to use when displaying text in programs setting affects all user accounts on the
Chinese (Simplified, China)	~
	or state in xitongcheng.com

7. After restarting, you will find that the problem has been solved
